Professional Summary

Enthusiastic Data Analyst (Fresher) with strong knowledge of SQL, Power BI, Tableau, Python, and Alteryx. Hands-on experience through projects involving data cleaning, visualization, clustering, and generating actionable business insights.

Work Experience

Channelplay limited — Nov 2022 – Feb 2025

Quality Associate

Project

Customer and Sales Performance Analysis (Retail Sector)

- Did the project for a US-based retail client aimed at improving their understanding of customer behaviour and sales performance.
- The core objective was to segment customers based on their purchasing behaviour and order patterns, analyze sales trends, and create an interactive dashboard in Power BI for business insights.

Environment: Power BI

Demand Analysis- Cluster Model

- Did the project for a US-based client by identifying the location for new service plants to be opened based on the demand data available with Latitude and Longitude.
- Targeted to meet 80% of demand in 2 transit days. Generated demand centric clusters using K- Mean cluster in SQL.

Environment: SQL, Alteryx
