PROJECTS

Web Designing & Web Developing

1) Deepword [1 month]: Html, Css , Boostrap , Jquey

- Develop beautiful, functional standards-based websites from start to finish for startups and small businesses that feature user-friendly design and clear navigation. This entails designing, coding, and modifying websites from layout to function according to clients' needs.
- Deep Word only needs video and audio input to create your videos.
- Concepted and designed solutions for multiple touch points, including print, interactive, video and environmental graphics
- Have provided a robust solution for design with nicer UI/UX for user experience
